

Name (optional): _____

End-of-Year Feedback Sheet!

Please use complete sentences. Be as honest as you can. Don't be quick and vague – put some thought into your answers. This will give me the best possible feedback!

1) Please start by giving your overall feedback. Write whatever comes to mind first when reflecting back on this year in math class!

2) On a scale from 1 – 10, rate this class based on how HARD it was for you. 1 means it was very easy, 10 means it was very difficult. Explain your rating.

3) In this class, I did:

Better than I thought I would

About the same as I thought I would

Worse than I thought

4) Write about your relationship with math. (Your opinions/feelings about it, etc.) What was it like coming into this year? Has it changed? Stayed the same? Why?

5) Describe how well Mr. Lischwe's teaching style worked for you and explain why. You can talk about how fast he went (too fast, too slow?), how well you understood the way he explained things, his style of lessons, the amount of whole class problems/activities/group work/individual practice we did, etc.

6) What were some things Mr. Lischwe did that helped you learn best?

7) What are some ways Mr. Lischwe could improve this class for next year?

8) Homework?

WAY too much

A little too much

Just right

Not enough

9) My thoughts on ALEKS are: (pick one from each row)

I hated it

I didn't really like it

It was fine

I did not find it useful

I found it useful a few times

I found it useful most of the time

10) Looking back on this year, is there anything you think you should have done differently? Explain.

11) One math topic I feel like I learned really well this year was:

because:

12) Choose one day/one activity (or more) in this class that was memorable for you and explain why.

13) My advice to the students who will be taking this class next year is:

14) Free writing space – say anything you want to Mr. Lischwe here!
