Graphing Practice

Graph each equation. (2 equations per graph) BE CAREFUL – some equations are not in slope-intercept or standard form, so you will have to be creative in how you graph them!
1) $-6x + 4y = 30$ 　　　　　3) $y = -x - 4$ 　　　　　5) $3x = 12 + 4y$

2) $-10y = 50 - 6x$ 　　　　　4) $3y + 6x = 60$ 　　　　　6) $6x + 4y = 0$
