

**BRING TEXTBOOK
VOLUME 2!**

**(we are actually using it
during class today)**

Created by: Anonymous (an Iowa hater)

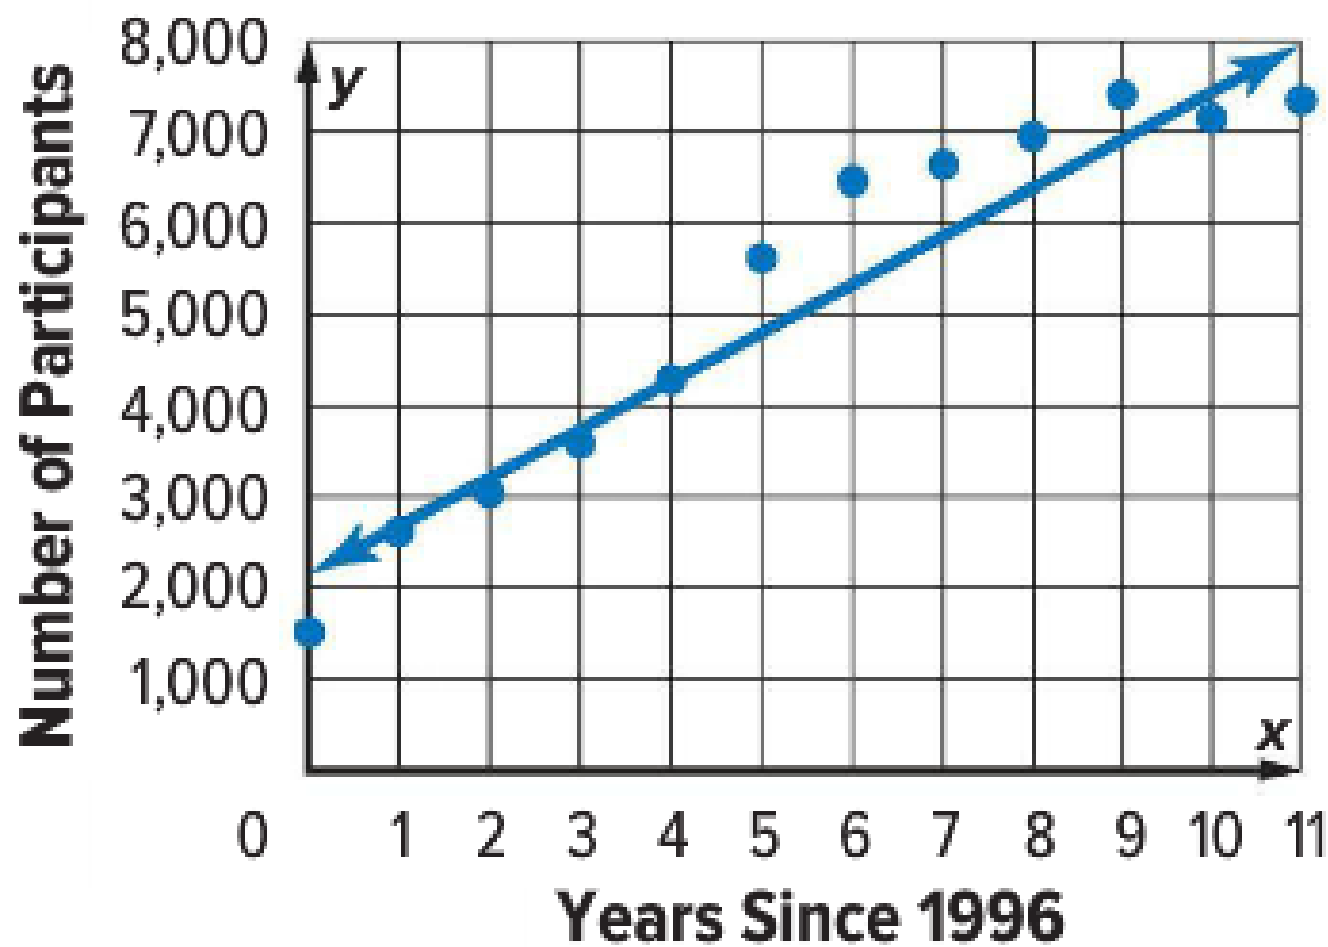

Warmup 4/(# of points Tennessee beat Iowa by – 2)

*****GET A CALCULATOR*****

*****REMEMBER TO PUT IT BACK AFTER CLASS*****

- 1) Do page 68 | #3. (You can write it in the book. You will not have to tear it out. On your warmup page, just write “book problem”)

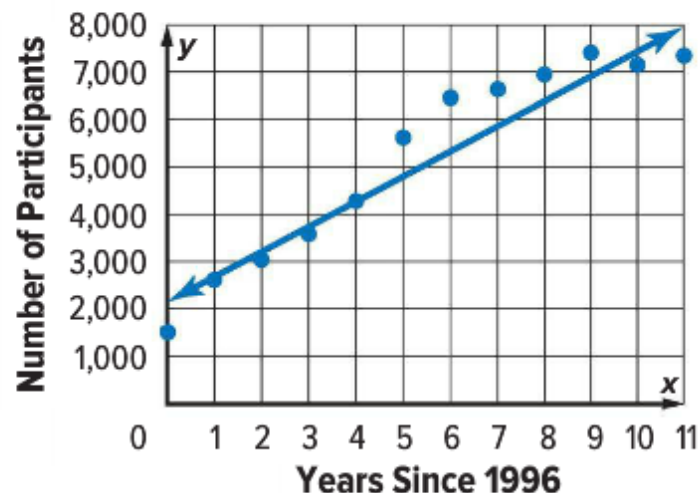

(“Interpret” means “describe what the numbers represent in terms of the situation)

#3

3 The scatter plot shows the number of girls who participate in ice hockey. (Examples 3 and 4)

- a. Write an equation in slope-intercept form for the line of best fit that is drawn, and interpret the slope and y-intercept. Sample answer: $y = 500x + 2,250$; Every year an additional 500 girls play ice hockey. In 1996, 2,250 girls played ice hockey.
- b. Use the equation to make a conjecture about the number of girls that will participate in ice hockey in 2020. Sample answer: 14,250 girls

Table of Contents (2nd Semester)

p. 1	Exponent Basics (1.2)
p. 2	Multiplying and Dividing Powers (1.3)
p. 3	Power to a Power (1.4)
p. 4	Zero & Negative Exponents (1.5)
p. 5	Scientific Notation (1.6)
p. 6	Calculating with Scientific Notation (1.7)
p. 7	Angle Basics
p. 8	Angles formed by Parallel Lines (5.1)
p. 9	Transformations (6.1 – 6.3)
p. 10	Rotations (Handout)
p. 11	Reverse Transformations
p. 12	Pythagorean Theorem
p. 13	Distance on the Coordinate Plane (handout)
p. 14	Review: Circles
p. 15	Volume of Prisms and Cylinders
p. 16	Volume of Cones, Spheres, and Pyramids
p. 17	Scatter Plots & Lines of Best Fit
p. 18	Frequency Tables (guided notes!)

Numerical Data

Which of these are numerical data?

- Age
- Height
- Favorite Color
- Name
- # of letters in name
- Street you live on
- Distance you live from school

A scatter plot compares **NUMERICAL** data

- Age vs. Height
- # of letters in name vs. your grade in science
- Time you wake up vs. amount of time it takes you to get ready

What if it's NOT numerical data???

- Is there a relationship between hair color and eye color? For example, are blondes more likely to have blue eyes???

You would set up a frequency table

Hair Color

Eye Color

	Blonde	Brown/Black	Red
Blue			
Brown			
Hazel			
Green			

Sports/Music/Movies

See Guided Notes

FREQUENCY

	Music	Total
Boys	10	10
Girls	11	300

Is there an association between school and involvement in sports???

- In other words: Are the students at one school **more likely** to participate in sports than students at the other school?

	Sports	No Sports
Bluffington High	400	500
Bayside High	900	1800

% of Bluffington High who do sports: $\frac{400}{900} \approx 44\%$

% of Bayside High who do sports: $\frac{900}{2700} \approx 33\%$

Bluffington High students are **MORE LIKELY** to participate in sports!!!

*****IMPORTANT***: To find if there is an association, go by the percentages, not just the raw numbers!!!**

No Homework

- (unless you never did the benchmark)
