## Warmup 8/ $(\sqrt{\mathbf{2 3}})^{2}$

***GO BACK AND DO TOUGH PATTERNS
TUESDAY!!! (Early finishers - try Friday)****
Tough Patterns Tuesday

1. Draw step \#5.
2. Complete the table. \#blocks=4n+1
3. Write an equation for the pattern.

## Check Homework

## Add to your table of contents...

## Table of Contents

Simplifying \& Interpreting Expressions ..... p. 1
Solving Equations ..... p. 2
Fractions \& Story Problems ..... p. 3
Equations with No Solution or Infinite Solutions ..... p. 4
Inequalities ..... p. 5
Compound Inequalities ..... p. 6

When two simple inequalities are combined into one statement by the words AND or OR, the result is called a compound inequality.

Task \#6

## Math as Another Language!

$\square$ Translate these phrases into "math language." Graph the solution.
(1 )All real numbers greater than 2 AND less than 6

(2) All real numbers greater than or equal to 2 AND less than or equal to 6

$$
x \geq 2 \text { AND } x \leq 6|2 \leq x \leq 6|
$$

(3 )All real numbers less than 2 OR greater than 6 $x<2$ OR $x>6$
(4) All real numbers less than or equal to 2 OR greater than of equal to 6 $x \leq 2$ OR $x \geq 6$
(5) All numbers between 8 and 16

$$
x>8 \text { AND } x<16 \quad 8<x<16
$$

(6) All numbers between 8 and 16 inclusive

$$
x \geq 8 \text { AND } x \leq 16 \mid 8 \leq x \leq 16
$$

Write the compound inequality shown by each graph.

$$
\begin{array}{cccccc}
\underset{-10-8}{ }-6-4-2 & 0 & 2
\end{array} x \leq 8 \sigma R x>0
$$

Solve the compound inequality and graph the solutions.

$$
\begin{gathered}
4<x+2<8 \\
-2<-2 \\
2<x<6
\end{gathered}
$$

Solve the compound inequality.

$$
\begin{aligned}
& -5 \leq 2 x+3<9 \\
& \frac{-3}{-8} \subseteq \frac{2 x}{2}<\frac{6}{2} \\
& -4 \leq x<3
\end{aligned}
$$

Solve the inequality and graph the solutions. $\frac{2 x}{2} \leq \frac{6}{2}$ OR $\frac{3 x}{3}>\frac{12}{3}$

$$
x \leq 3 \text { or } x>4
$$

Solve the compound inequality and graph the solutions.

$$
\frac{-2+r<12 \text { OR } r+5>19}{-2 \quad-2 \quad-5}-5
$$

## Word Problem Time!

The target heart rate during exercise for a 15 year-old is between 154 and 174 beats per minute inclusive. Write a compound inequality to show the heart rates that are within the target range. Graph the solutions.

$$
154 \leq H \leq 174
$$

The pH level of a popular shampoo is between 6.0 and 6.5 inclusive. Write a compound inequality to show the pH levels of this shampoo. Graph the solutions.

$$
6 \leq p \leq 6.5
$$

$\square$ Ms. Bolus' classroom is ridiculous! It is either less than 60 degrees Fahrenheit or above 80 degrees Fahrenheit every day.

$$
T<60 \text { OR } T>80
$$

## Homework

- p. 89 (11-23)
