

Warmup 9 / (Oscar's age) - (Big Bird's age, + Zoe's age + Elmo's age + Grover's age + Snufflupagus' age)

Throwback Thursday

Simplify the following by cross canceling:

$$1. \frac{\cancel{15}}{\cancel{2}} \cdot \frac{\cancel{20}^{10}}{\cancel{50}_{10}} = \frac{10}{10} = \textcircled{1}$$

$$2. \frac{\cancel{1}^{\cancel{8}}}{\cancel{4}} \cdot \frac{\cancel{256}^{64}}{\cancel{8}_3} = \textcircled{\frac{64}{3}}$$

$$3. \frac{14}{9} \div \frac{21}{81} =$$

$$\frac{\cancel{2}^{\cancel{14}}}{\cancel{9}} \cdot \frac{\cancel{81}^9}{\cancel{21}_3} = \frac{18}{3} = \textcircled{6}$$

$$4. \frac{10}{15} \div \frac{90}{25} \cdot \frac{9}{5} =$$

$$\frac{\cancel{10}}{\cancel{3}^{\cancel{15}}} \cdot \frac{\cancel{5}^{\cancel{90}}}{\cancel{10}_9} \cdot \frac{\cancel{9}}{\cancel{5}} = \textcircled{\frac{1}{3}}$$

NEW UNIT!

- **In the last unit, we learned about ALL DIFFERENT types of functions...**

Types of Functions

- **Functions with an x^2 term make parabolas...**

Types of Functions

- **Functions with absolute value make a “v” shape...**

Types of Functions

- **Functions with a square root make this shape...**

Types of Functions

- **Functions with a variable as an exponent make this shape...**

Types of Functions

- **Functions with “sin” and “cos” make wavy graphs...**

Types of Functions

- ...and functions with the form $\boxed{x} + \boxed{}$ make straight lines!

In this unit...

- We are going to now focus exclusively on **linear** graphs. These are probably the most common, and useful, type of function.
- Anything that has a constant rate is linear!

Add to your table of contents...

Table of Contents

Simplifying & Interpreting Expressions	p.1
Solving Equations	p.2
Fractions & Story Problems	p.3
Equations with No Solution or Infinite Solutions	p.4
Inequalities	p.5
Compound Inequalities	p.6
Solving for a Variable	p.7
What is a Function?	p. 8
Continuous or Discrete	p. 9
Domain & Range	p. 10
Slope	p. 11

Slope

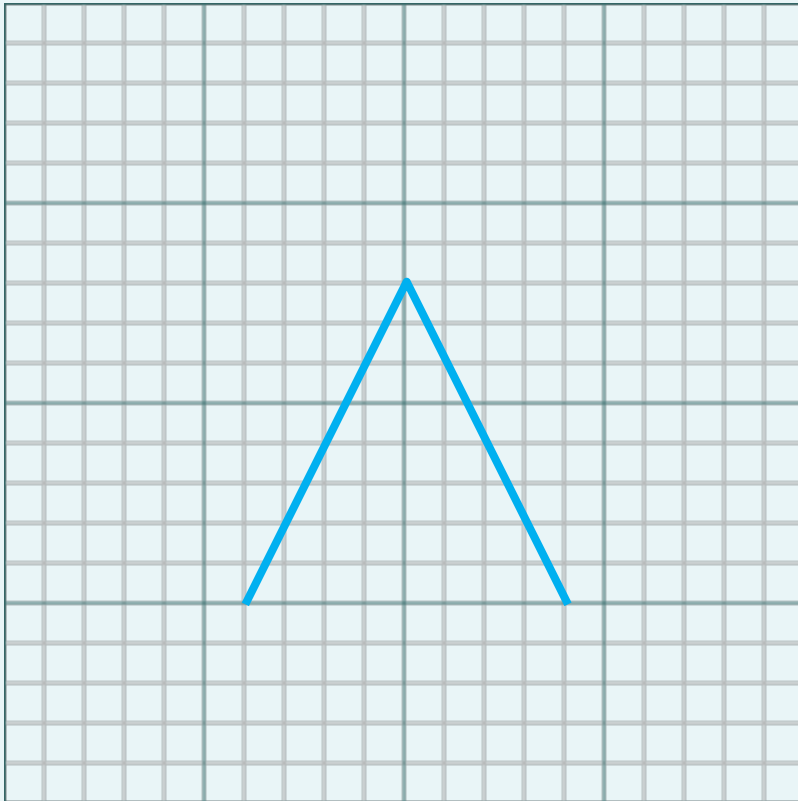

Objectives:

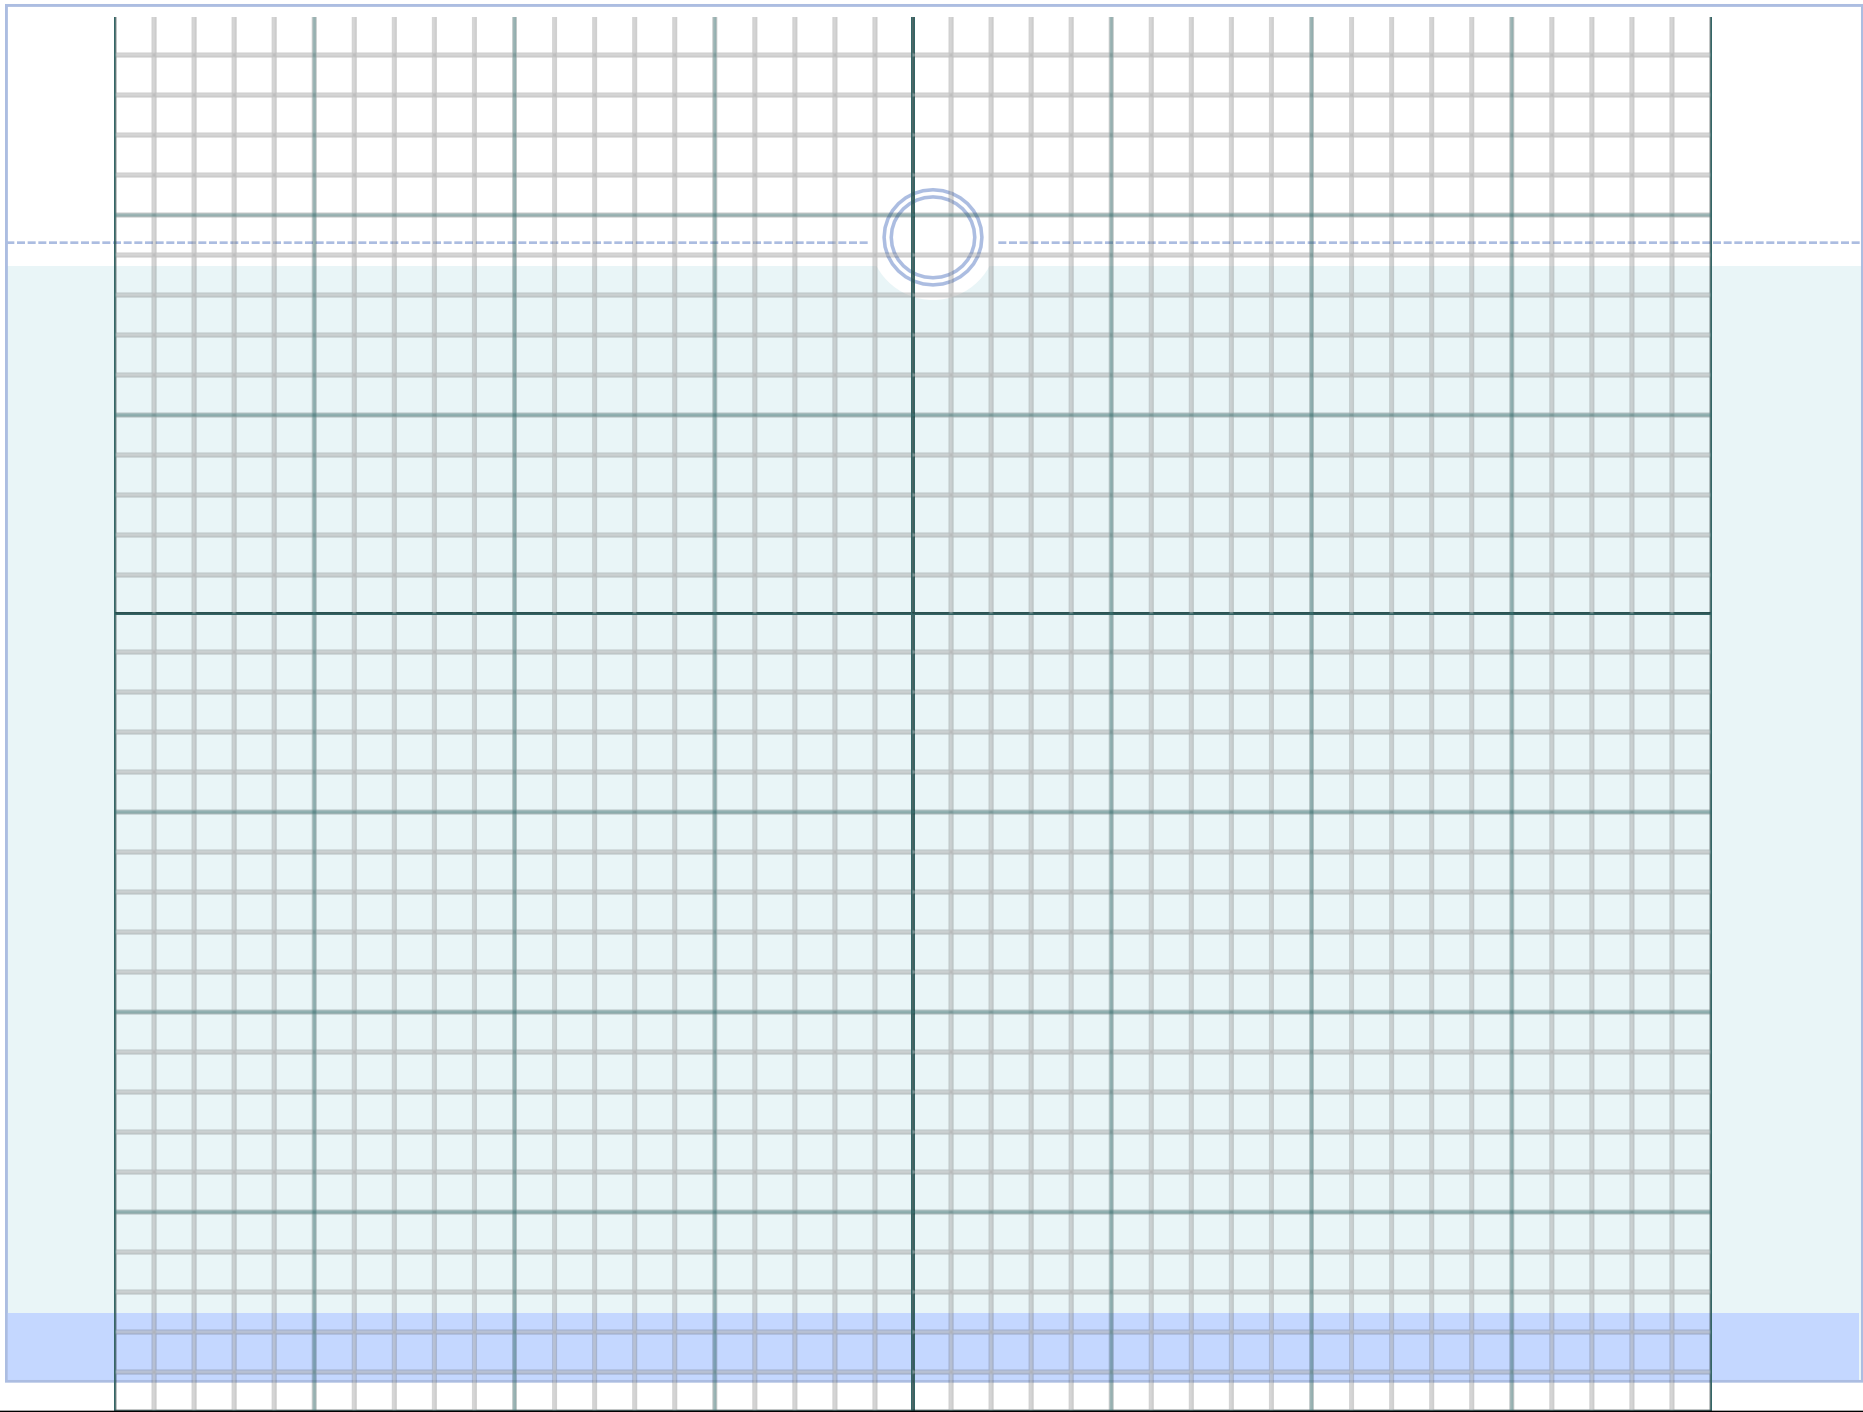

-Be able to find the slope of a line on a graph! -

Which roof is steeper???

Which roof is steeper?

Which roof is steeper?

Increases 2 numbers for every 1

Increases 1.5 numbers for every 1

- **SLOPE describes how steep a line is.**
- **It tells you how much the graph increases for each x.**
- **Bigger slope number = steeper line!**
- **A straight line will NEVER CHANGE SLOPE!!!**

Linear Functions

- have a constant rate of change (the rate of change is the same on every interval)
 - This constant rate of change is called slope

How to find Slope from a Graph:

Pick two points, then find the:

- $\frac{\text{change in } y}{\text{change in } x}$
- (Also known as $\frac{\text{rise}}{\text{run}}$)

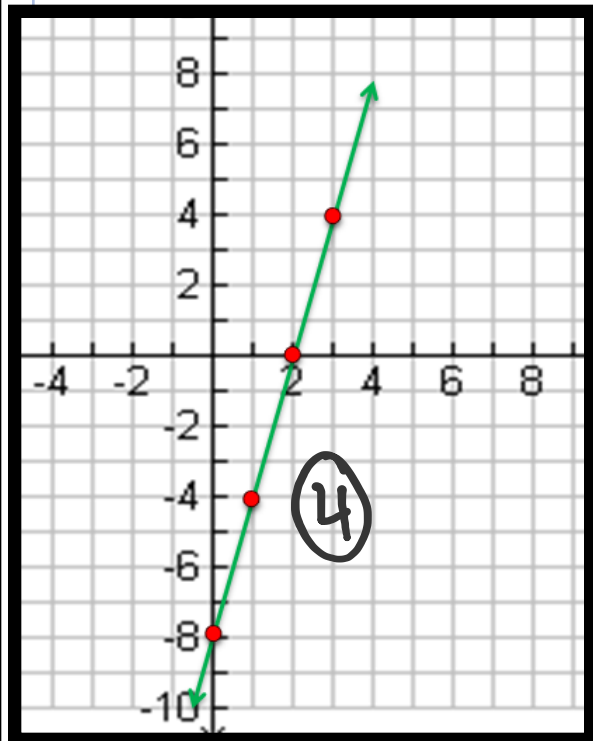

Which line is steeper?

How steep is this line?

How steep is this line?

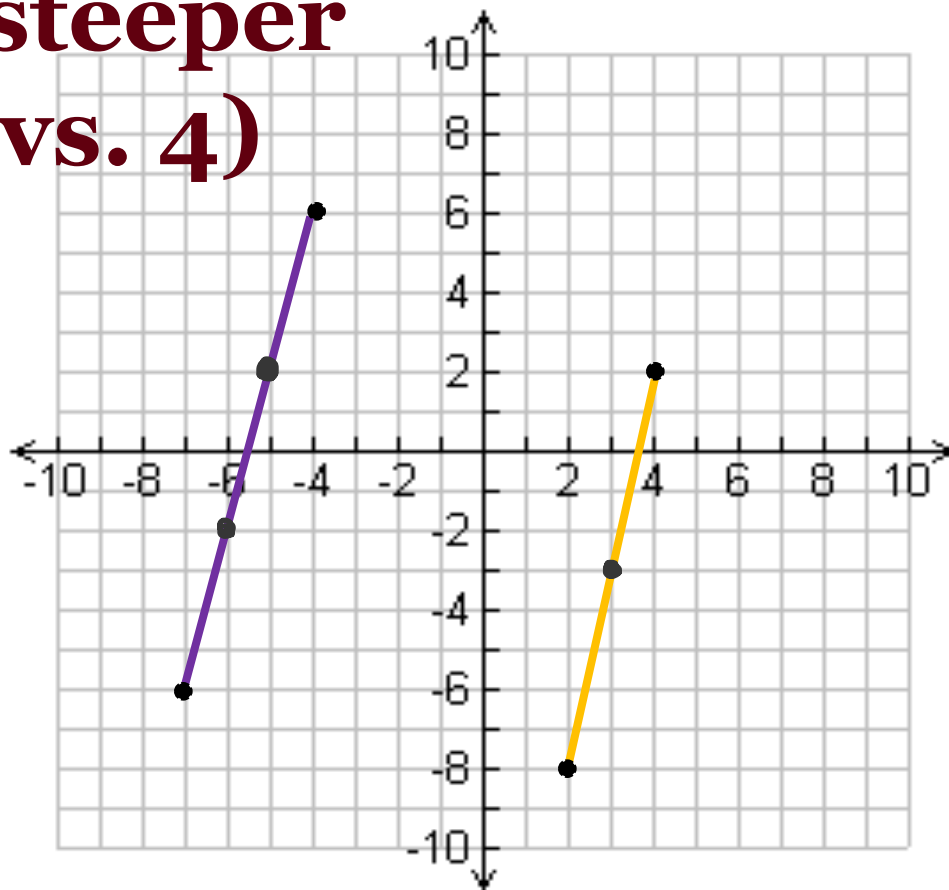

$$\frac{5}{2} = 2.5$$

Which line is steeper?

**Yellow line
is steeper
(5 vs. 4)**

How steep is this line?

$\frac{3}{4}$

How steep is each line?

Find the slope...

$$\frac{12}{3} = 4$$

Find the slope of each line...

$$\frac{3}{4}$$

$$\frac{2}{1}$$

Find the slope of each line...

$$\frac{-5}{+7} = \left(-\frac{5}{7}\right)$$

$$\frac{-3}{+6} = \left(-\frac{1}{2}\right)$$

Find the slope:

SCALED BY 5's!

Slope = $\frac{5}{2}$
(NOT $\frac{1}{2}$)

Find the slope of each line...

$$\frac{0}{3} = 0$$

$$\frac{3}{0} = \text{undefined}$$

Positive

Negative

Zero

Undefined

- Find the slope of each line.

Blue slope = $\frac{1}{3}$

Green slope = ~~-2~~
 $-\frac{5}{2}$

Purple slope = $\frac{0}{10} = 0$

Yellow slope = $\frac{13}{0}$
= UNDEFINED!!!

Which one of these lines could it be?

$$\textit{Slope} = -\frac{1}{4}$$

Homework

- **Worksheet**
